

Place the paper and ruler down in front of you horizontal. Then mark a SMALL little dot one inch apart on paper.

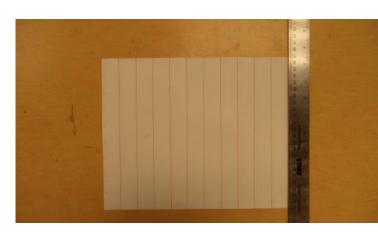

Line up the edge of your paper where the lines start on you ruler like is shown in this picture. Then make a small mark every inch.

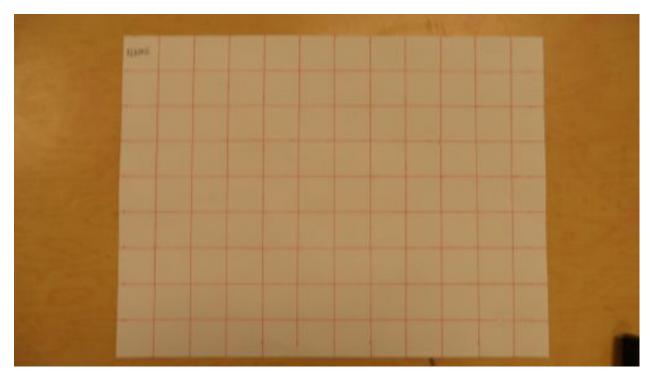

Like you did at the top of your paper, mark every inch on all **four** sides of your paper. Remember to keep dots light enough to erase and dark enough to see.

Connect top left dot to bottom left dot. Then continue to the next top left dot and bottom left dot. Remember to draw very light.

Once you have all your vertical lines drawn on your paper, draw all of the horizontal lines. When you finish you should have a 9X12 inch grid. Write your name in top left corner. Label top row A,B,C,D,E,F,G,H. Then label under name 1,2,3,4,5,6,7,8. See example below.

	NAME	A	В	C	D	ŧ
7 5	1					
	2					
				-	100	

Does your grid look a lot like this? (with the exception that you will be using a pencil, drawing very light lines, and you grid won't say "Example" on it.)
